

UL approved Single Phase transformer series WST2UL

The transformers in the WST2UL series are specially approved for the North American market and meet national and international requirements for worldwide use. Designed according to the following specifications:

- **Voltages selectable** by customer prior to order
 - Primary nominal voltage range 110V-600V incl. any number of taps possible (e.g. +/-10% over voltage taps)
 - Maximum 4 separate secondary windings incl. any number of taps possible (sum max. 660V when using over voltage taps)
 - Open frame, stationary, for device installation and assembly in dry rooms, separate windings.
 - From 50A with terminal blocks on top bracket
 - High reliability and long life
 - Low overall losses, high efficiency
 - Above-averagely high power for short-time operation
 - Upon request by the customer for secondary voltage to 50VAC (V no-load) non-isolated cable connection (optional)
 - Optional: PE screw terminal connector and PE shield
- Autotransformer** * adapted to type power

*) Suffix -A = Autotransformer

Specifications

Power:	500VA – 25kVA
Frequency:	50 – 60 Hz
Primary:	100V - 600V
Secondary:	10V – 600V (0.5-3kVA), 19V – 600V (8 – 13kVA) or 80V – 600V (16 – 25kVA)
Temp. class:	ta40°C/B
Protection:	IP00
According to:	EN 61558
Approval:	UL5085 / CSA 22.2

Dimensions and fittings:
